INTRODUCE

As a Web Programming student at FPT Polytechnic College in Da Nang, I am passionate about coding and eager to apply my skills in real-world projects. With experience in PHP and JavaScript through personal and workshop projects, I aim to gain hands-on experience, improve problem-solving abilities, and grow professionally in the field of software development.

EDUCATION

Bachelor of Web Programming

FPT Polytechnic
09/2023 - 09/2025

SKILL

Programming Languages: HTML5 & CSS3, PHP, JavaScript, TypeScript.

Database: MySQL.

UX/UI: Figma

Framework: Laravel, NestJS, React, VueJS.

AI Tools: ChatGPT, Claude AI, Cursor,

Soft Skills: Problem-solving, communication.

Development Tools: VS Code, Antigravity

Other: Wordpress, GitHub, Basic git, Knowledge of RESTful API.

LANGUAGE

Vietnamese

English

EXPERIENCE

Personal Project: Dola Restaurant Website

2026

- Project: Developed a full-stack restaurant management and ordering website with customer-facing and admin interfaces.
- Implemented features including menu management, table reservations, QR-based table ordering, order tracking, and payment processing.
- Technologies: React, NestJS, MySQL, TypeORM, JWT, RESTful API.
- Front-end: Developed responsive interfaces for customers and administrators.
- Back-end: Designed RESTful APIs and implemented business logic for restaurant operations.
- Role: Full-stack Developer – Analyzed requirements, designed database structures, and developed core features.
- GitHub: <https://github.com/NguyenQuan1/Dola-restaurant.git>

Personal Project: News Website

2025

- Project: Personal project developing a news website using the MVC architecture with Laravel. Users can browse news by category, search articles, and view article details. The admin panel supports management of posts, categories, and users.
- Technologies: Laravel, PHP, MySQL, Blade, JavaScript, Bootstrap
- Front-end: Developed user interfaces for browsing, searching, and commenting on articles.
- Back-end: Implemented CRUD operations for users, posts, categories, and comments.
- Role: Developer – Analyzed requirements, designed the system, and implemented core features.
- GitHub: <https://github.com/NguyenQuan1/news.git>

Personal Project: Pet Shop Website

2024

- Project: An e-commerce website for selling pets built with PHP. Users can browse products, add items to cart, and place orders. Admin manages products, categories, users, and orders.
- Technologies: PHP, HTML5, CSS3, JavaScript, Bootstrap, MySQL
- Front-end: Designed and developed user interfaces for browsing and purchasing pets.
- Back-end: Implemented CRUD operations for users, products, categories, and cart, with detailed statistics.
- Role: UI/UX Analyst & Designer – Analyzed project requirements (DOC), designed the database, and created UI mockups in Figma.
- GitHub: <https://github.com/NguyenQuan1/petshop.git>
